

BARGE AND SHIP ACCESS SYSTEMS

MUSTANG
MARINE

Mustang Marine offers a full line of access systems and individual components. Our products are available for use by the U.S. Navy as well as foreign Navies and commercial operators.

Our engineers have extensive experience in the design and manufacturing of barge and ship access systems. Let us help guide you through the process of determining what type and size system is best suited for your application. We provide the best personal service in the industry and have the highest commitment to meeting or beating project deadlines.

Typically manufactured in 6061-T6 aluminum our products provide a long, corrosion free life. Other material, such as 5086 aluminum and steel are also available.

We manufacture both truss and beam style gangways and accommodation ladders. Our decking and treads meet the same requirements as those used for the U.S. Navy.

We offer the following options:

- Fixed, Curved or Self Leveling Treads
- Fixed or Rotating Upper Platforms
- Fixed or Adjustable Lower Platforms
- Dock Rollers and Slides
- Winches, Hydraulic/Pneumatic Lifting Systems
- Davits, Lifting and Stowing Gear

As with all Mustang Marine products, custom designs are our specialty. Contact us to discuss your project.
